Friday, May 10, 2013 - 02:00

### Instrument List:

- [Green](#)

Discussion:

D3R radar is running fine tonight. It was stopped scanning at 06:50 UTC when the precipitation moved out of the umbrella. The achieving of time series data suspends improperly sometimes. We need to restart the archiving if this happens. The moment data was backed up and time series data is being backed up now.

Haonan Chen and Manuel Vega
